UNLIMITED COLOR CHOICES

Linetec's in-house computerized blending offers you an unlimited choice of colors. We provide custom color matching service and reliable lead times on custom color orders. Color consistency is exceptional from batch to batch and project to project.

REQUEST COLOR SAMPLE CHIPS

Linetec's Select & Spec tool gives you the opportunity to view multiple color palettes and order painted aluminum samples online. Our goal is to supply architects and design professionals seeking long-lasting finishes with the right color choices for envisioning projects.

Email PaintSamples@Linetec.com or visit Linetec.com and use our Select & Spec Tool to order samples.

These colors are reproduced as closely as possible to the actual paint coatings and are to be used only as a guide.

PAINTING Linetec enjoys partnerships with PPG, Sherwin Williams and Akzo Nobel, the leading manufacturers of high-performance architectural Kynar® and Hylar® PVDF coatings. With over 50,000 unique colors in our palette and the ability to match almost any color in-house, Linetec will provide the perfect color for your project.

QUALITY Through the use of our five-stage chrome pretreatment system and our highly automated paint line, Linetec produces top quality finishes with consistent results and warranted coatings. With this technology and our Quality Assurance team inspecting every job for color, mil thickness, appearance and multiple other performance specifications, you can be assured of the best possible finish.

CARE & CLEANING The Kynar and Hylar PVDF based products that meet AAMA 2604 and AAMA 2605 specifications are warranted to retain their color and gloss level for many years. To ensure they retain their original beauty, these highly durable finishes should be cleaned occasionally. When selecting a cleaning solution use mild soap solutions; avoid using strong acid or alkali cleaners as they may damage the finish. For additional information regarding care and cleaning contact your Linetec representative or visit www.linetec.com.

MATERIAL SIZE GUIDELINES

STANDARD

Length 28' 6" (342")
Height 6' (72")
Width 2' 4" (28")
