

The **CLADLOK™ VS (Value Series)** Flat Panel Program offers an economical alternative to our standard CLADLOK™ line while maintaining design versatility and aesthetic appeal. These flat panels provide a smooth, level surface with clean lines and can be installed vertically or horizontally to accommodate various design visions. Engineered for efficiency, the modular cassette-style system features interlocking edges formed from a single piece of metal, eliminating the need for additional components beyond the fasteners. This streamlined approach allows for faster installation compared to other cladding systems, making it a cost-effective solution without compromising architectural flexibility. Compatible with a wide range of substrates and subgirt systems, the CLADLOK™ VS Panel System delivers both performance and style for modern façades.

### CLADLOK™ Value Series Features & Benefits

- Economical
- Non-Combustible
- 100% Recyclable
- Pressure Equalized Rainscreen
- Available in .080" Aluminum
- 2-Piece Extrusions
- 2 & 3 Coat Solid and Mica Finishes
- 20 Year Finish Warranty on Painted Options
- Works Well with Continuous Insulation
- No Sealants or Gaskets
- Quick Installation
- Little to No Maintenance
- Short Lead Times
- Made in the USA

### Our VALUE Series system is fully tested to the following standards:

- |                 |   |
|-----------------|---|
| • AAMA 508-7    | Pressure Equalized Rainscreen Test              |
| • AAMA 501.1-05 | Dynamic Water Infiltration Test                 |
| • ASTM E283-04  | Static Air Infiltration                         |
| • ASTM E330-02  | Structural Design loads (40psf)                 |
| • ASTM E331-02  | Static Water Infiltration                       |
| • ASTM E1233-06 | Standard Test Method for Structural Performance |
